

# Dutch policy on CE and the value of a regional approach

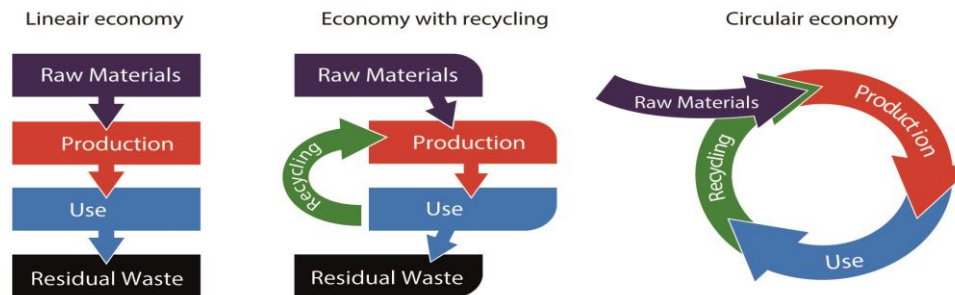

SCREEN, London, Nov 21th, 2017

*Arnoud Passenier  
Senior Program Manager Circular Economy  
The Netherlands*

# NL goals for a Circular Economy

- In 2050 100% circular, in 2030 half way
- Focus on three developments:
  - High quality use of raw materials in existing value chains
  - Use of sustainably produced, renewable and generally available raw materials
  - Fundamental change in production and consumption

# National Agreement on Circular Economy

- Signed by more than 350 stakeholders
- Based on policy program 'The Netherlands Circular by 2050'
- Parties endorse strategic goals and sub-goals
- Only signatories are involved in developing transition agendas
- Transition Agenda's are being developed together:
  1. Biomass & Food
  2. Plastics
  3. Manufacturing Industries
  4. Building & Construction
  5. Consumer Goods

## Transition Agenda's (1)

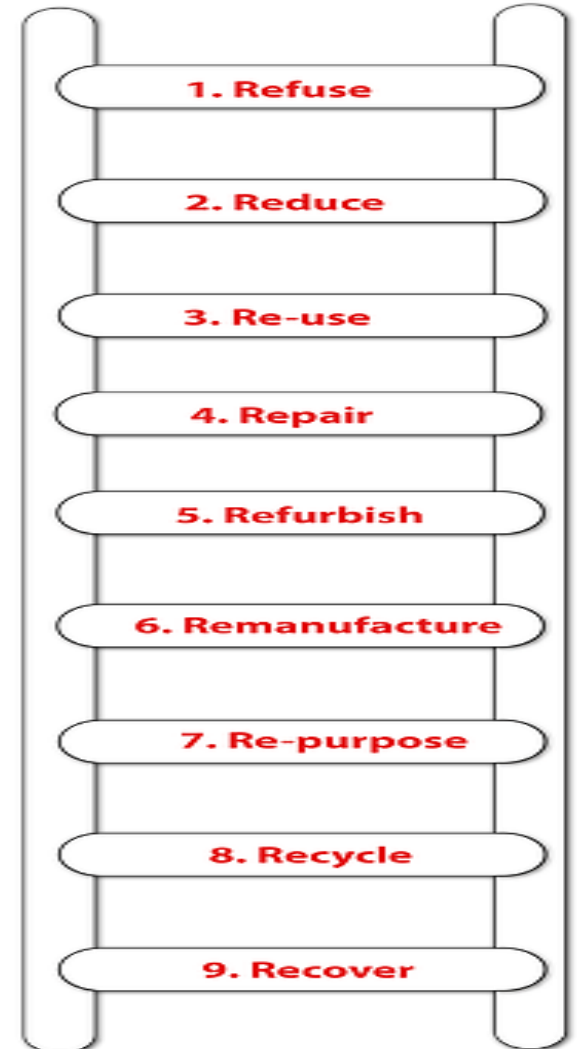

- Common goal : accelerate transition CE
- Urgency: CO<sub>2</sub>-emissions, wastage of materials, environmental damage (eg plastic soup)
- Less unnecessary use, less fossil resources, less waste incineration, landfill and export
- More demand for and high quality of recycled/biobased materials (10R-ladder)

## Transition Agenda's (2)

- More demand of recyclates:
  - Higher tax incineration recycleble waste
  - Extend producer responsibility
  - Enhance circular design & procurement
- More supply:
  - Mechanical/chemical recycling
  - Promoting craftsmanship (Circular Craftmanship Centres)
  - Hot spots of circular business development (Silicon Valleys of the future): choose specific regional profile!
